---

Hello Team,

This week we will have a discussion about our approaches to synthesizing the literature for our sections, specifically, the content of tables needed so that we do not have paragraph by paragraph study summaries and how the tables and text will complement each other. We can also discuss how the table format can support the needed detail in the tables.

Some of the toxicologists on the team have been talking about these issues over the past weeks and I am hoping we can arrive at some mutual understanding if not total agreement. Here is a table template and meeting synopsis provided by Andrew and a proposed template from Danielle below.

Thanks, Barbara

Hi all,

I thought it might be useful for the group to see the existing tables (attached below).

(b) (5)

It seems like the tables will be harder to follow - and it will be considerable effort to have this done.

Danielle
